

Woman the Hunter –project

Woman the Hunter project is led by LAG Karelian Hills Leader and aims to create an international network of huntresses. The network connects huntresses group's knowledge, culture and experience to enhance understanding and cooperation of the huntresses' activities nationally and internationally as well as hunting communities in general.

Woman the Hunter -project will involve different networks to communicate and interact in themes related to wild food, nature conservation & game keeping and education and thus increases understanding and appreciation of regional and national hunting cultures by learning from other cultures.

The main objectives of the network is:

- to help huntresses groups to create and develop activities for their members,
- to involve young people into outdoor activities and hunting by education that emphasises the sustainable use and the appreciation of the Nature
- to improve the image of the hunting by organising events and activities for public in themes related to wild food, nature conservation & game keeping and education

The project is funded by the LEADER –program (European Agricultural Fund for Rural Development) in participating countries.
